PROFESSIONAL EXPERIENCE

Information System Security Engineer

Noblis MSD

October 2020-Present

- Conducted Nessus Scans for the Department of Navy Systems; scanned over 500 critical systems to reduce vulnerabilities and increase security posture.
- Provide comprehensive cyber risk evaluation while leveraging a vast array of system assessment compilations including ACAS, RMF controls, Nessus scans, existing mitigation, and STIG mitigation.
- Created a network diagram for the Information System Security Manager (ISSM) for the success of the system security plan.
- Documented findings and provide recommended corrective actions to bring critical systems into security compliance with RMF standards in a cost-effective way on schedule.
- Installed anti-virus software (McAfee) on 100's of laptop systems for the Department of the Navy preventing 1000s of possible malware attacks.
- Assisted asset manager in gathering inventory on over 1000 Department of the Navy Systems, helping to solidify the security baseline.
- Developed and modified standard operating procedures for training cyber engineers on conducting vulnerability management.

Junior Systems Administrator

Noblis MSD

October 2018-October 2020

- Assisted Noblis MSD in the transition to Microsoft GCC High, to meet FedRam high impact requirements.
- Provided support for Microsoft Suite of applications including but not limited to, Office 365, Exchange, Sharepoint, Teams, Azure AD, OneDrive.
- Conducted research on active directory (AD) accounts to remove dormant and temporary accounts to help maintain the security posture on Noblis's network and removed potential exploitation of unused accounts.
- Provided remote and desktop support to McKean Defense Group employees
